

**Leaf and Yard Waste Collection
For
Lower Salford Township Residents**

Leaf waste shall be collected curbside at least once during the spring and at least once during the fall of each year by all municipal waste collectors operating in the Township (Ordinance #2011-04).

The Township has designated the last week of November and the first week of May as approximate dates for the curbside collection. Haulers are to advise customers of specific dates for these pick-up dates. No more than 10 bags per collection.

Residents must purchase their own biodegradable bags. Bags are also available at the Township Office at 35 cents each, 3 for \$1, or 50 for \$16.50.

Customers can be billed by their hauler for this DEP mandated collection.

Haulers are required to report tonnage collected from each collection to the Township.

The Township also provides another option for the disposal of yard waste and leaves (no grass clippings) in recyclable bags. Residents can bring their bags to the Township Municipal Building and deposit them in the large container located at the upper parking lot. Drop offs are accepted year round during daylight hours.
